Revenue has grown every year (2011-2014), with a strong seasonal peak in Nov-Dec and a dip in Feb/Jul — suggesting the business should front-load inventory ahead of Q4 and explore promotions to offset the July slowdown.

CATEGORY AND SUB-CATEGORY PERFORMANCE

Tables is the biggest red flag — ₹7.57L in revenue but a -24.20% margin, meaning the business loses money on every sale. Binders, Appliances, and Machines are similarly unprofitable despite meaningful revenue, suggesting these sub-categories need a pricing or discounting review. In contrast, Paper and Labels (both under Office Supplies) are the most efficient performers, with margins near 20% — worth examining what's driving their profitability to see if it's replicable elsewhere.

Category	Total Revenue	Sum of Profit	Avg Profit Margin %
☐ Office Supplies	37,87,070.23	5,18,473.83	5.90
Paper	2,44,291.72	59,207.68	19.68
Labels	73,404.03	15,010.51	11.99

Total Revenue

by Country

Revenue is heavily concentrated in the US (₹2.30M, over double the next country), with Australia, France, and China forming a solid second tier — a useful target list for geographic diversification.

DISCOUNT IMPACT

Discounting has a severe, almost linear negative impact on profitability. Orders with no discount generate 1.77M in profit, but profit collapses as discount increases — dropping to just 0.19M at Medium discount (20-40%) and turning outright negative (-0.63M) at High discount (40%+). Combined with the scatter chart showing the same downward trend at the sub-category level, this strongly suggests the business should cap discounts well below 40%, or restrict deep discounting to specific low-margin-risk sub-categories rather than applying it broadly.

CUSTOMER SEGMENTATION (RFM)

Customer ID	Frequency	Recency	Monetary
BW-11110	35	55	30,613.62
GT-14710	30	9	34,471.89
HL-15040	20	31	29,664.23
PS-19045	26	21	29,252.32
RB-19360	25	21	29,197.63
SE-20110	36	10	29,532.63
SM-20320	21	22	31,125.29
TA-21385	25	19	35,668.12
TC-20980	28	28	34,218.27
ZC-21910	37	4	28,472.82

Top 10 customers by spend are highly frequent buyers, and most stay actively engaged (Recency under 30 days) — except BW-11110, who hasn't ordered in 55 days despite ₹30,613 in lifetime spend, making them a strong re-engagement target. The scatter also confirms High-segment customers combine both high frequency and high monetary value, validating the RFM segmentation.
